

HomeWorks QS Wired Palladiom Keypad

The HomeWorks QS wired Palladiom keypad allows the user to control lights, shades/ draperies, temperature, and 3rd-party equipment. The keypad is wired to a HomeWorks QS processor on the QS link.

Large buttons are easy to use and button engraving is easy to read. Buttons with white, backlit engraving make it easy to find and operate the keypad in low light conditions. Keypads are available in a variety of colors, finishes, and button marking options.

Status of active button press or scene is indicated through intensity of backlighting which is configurable through the HomeWorks QS software. Dynamic Backlighting Management (DBM) automatically adjusts backlight intensity based on ambient lighting conditions. It can also be programmed in the HomeWorks QS software to adjust intensity by time of day or button presses.

Field Changes

Button engraving changes

Any keypad can have its buttons swapped in the field to change the engraving (e.g., 2-Button swapped for engraved 2-Button).

Button configuration changes

For easy system configuration changes, a 3-Button with Raise/Lower may be swapped in the field for a 4-Button.

Engraving Options

The Palladiom Keypad has engraving options ideal for many scenarios. The following information will help you determine which engraving option is best-suited to your needs.

Predefined Custom Engraving

Predefined project engraving is for instances when the customer knows the engraving details at the time of purchase and does not wish to order two sets of button kits. To select this option, use engraving option “E” when ordering the keypad.

Note: Orders cannot be processed until engraving information is received.

Generic Engraving and Post-Defined Custom Engraving

When engraving details are not known or specified at the time an order is placed, the generic engraving icons shown below will be sent to provide the customer with a usable keypad until the custom engraving details are determined. This keypad will be shipped with an engraving credit for ordering a custom-engraved button kit at a later time.

HomeWorks QS Wired Palladiom Keypad

QS Link Wiring

- Use SELV/PELV/NEC® Class 2 wiring to connect keypads to the QS link.
- Connect two 22 AWG (0.5 mm²) shielded, twisted pairs of wires to terminals 3 and 4 of the keypad control link connector. Shielding (drain) of the twisted-pair wires must be connected together as shown, but do not connect the shielding to earth/ground or to the keypad and do not allow the shielding to contact the grounded wallbox.
- The total length of wire on a QS wired link is not to exceed 2000 ft (610 m).

Note: Use appropriate wire connecting devices as specified by local codes.

- Each base unit model number counts as 1 device on the QS link.
- Each button column of a QS wired Palladiom Keypad consumes 1 power draw unit (PDU) on the QS link. For complete information, see “Power Draw Units on the QS Link” (Lutron P/N 369405).
